Note there is a meeting room C500A and a phone line; Ex. 6 - Personal Privacy } if you want to call in.

Here are the asks from Janet:

- An emissions inventory for art glass plants across the country.
- A summary of any monitoring results around those plants (e.g., School Air Toxics program had a monitor at a school near Uroboros Glass in Portland).
- Review 2011 NATA results to see if there is anything significant for glass plants, especially art glass plants.
- Identify current federal emission standards and, as appropriate, relook at applicability of the 2007 NESHAP (note: I believe there is already a call planned with R10 and Scott Throwe).

I am mainly concerned with items 1 and 4 - as I think items 2 and 3 are going to be the focus of just one group. But we can discuss if needed.

Please forward this notice to anyone else you think should attend.
